

**RAILROAD COMMISSION OF TEXAS
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET
NO. 04-0257314**

**IN THE FLORES, W. (VKSBRG.,
GEOPRESSURE) FIELD, STARR AND
HIDALGO COUNTIES, TEXAS**

**FINAL ORDER
AMENDING THE FIELD RULES
FOR THE FLORES, W. (VKSBRG., GEOPRESSURE) FIELD
STARR AND HIDALGO COUNTIES, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on June 27, 2008, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered by the Railroad Commission of Texas that the field rules adopted in Final Order No. 04-0213782, effective October 28, 1996, as amended, for the Flores, W. (Vksbrg., Geopressure) Field, Starr and Hidalgo Counties, Texas, are hereby amended as follow:

RULE 1: The entire correlative interval from 7,500 feet to 12,500 feet as shown on the log of the Bass Enterprises Production Co. - Bloomberg Well No. 10, (API No. 42-427-32905), Xavier Zamora Por 41 Survey, A-699, Starr County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Flores, W. (Vksbrg., Geopressure) Field.

RULE 2: No gas well shall hereafter be drilled nearer than THREE HUNDRED THIRTY (330) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than SIX HUNDRED SIXTY (660) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well; and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed, whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent

the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rule 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

RULE 3: The acreage assigned to the individual gas well for the purpose of allocating allowable gas production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be FORTY (40) acres. No proration unit shall consist of more than FORTY (40) acres; provided that, tolerance acreage of ten (10) percent shall be allowed for each standard proration unit so that an amount not to exceed a maximum of FORTY FOUR (44) acres may be assigned. The two farthestmost points in any proration unit shall not be in excess of TWO THOUSAND ONE HUNDRED (2,100) feet removed from each other. Each proration unit containing less than FORTY (40) acres shall be a fractional proration unit. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of gas. No double assignment of acreage will be accepted.

An operator, at his option, shall be permitted to form optional drilling units of TWENTY (20) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit. The two farthestmost points of a TWENTY (20) acre fractional proration unit shall not be greater than ONE THOUSAND FIVE HUNDRED (1,500) feet removed from each other.

Operators shall file with the Commission certified plats of their properties in said field, which plats shall set out distinctly all of those things pertinent to the determination of the acreage credit claimed for each well; provided that if the acreage assigned to any proration unit has been pooled, the operator shall furnish the Commission which such proof as it may require as evidence that interests in and under such proration unit have been so pooled.

RULE 4: The daily allowable production of gas from individual wells completed in a non-associated gas reservoir of the subject field shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

NINETY-FIVE percent (95%) of the field's total allowable shall be allocated equally among all the individual proratable wells producing from this field.

FIVE percent (5%) of the total field allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all proratable wells producing from this field.

It is further ordered that the allocation formula in the Flores, W. (Vksbrg.,

Geopressure) Field will remain suspended. The allocation formula may be reinstated administratively, in accordance with the Commission's rules, if the market demand for gas in the Flores, W. (Vksbrg., Geopressure) Field drops below 100% of deliverability.

It is further ordered that the wells listed on Appendix A, located in Starr and Hidalgo Counties, Texas, are hereby transferred into the Flores, W. (Vksbrg., Geopressure) Field.

Done this 29th day of July, 2008.

RAILROAD COMMISSION OF TEXAS
