HEARINGS SECTION**

**OIL AND GAS DOCKET
NO. 06-0279265**

**IN THE CARTHAGE (HAYNESVILLE
SHALE) FIELD, ANGELINA, GREGG,
HARRISON, NACOGDOCHES, RUSK,
SHELBY, AND PANOLA COUNTIES,
TEXAS**

**FINAL ORDER
AMENDING FIELD RULES FOR THE
CARTHAGE (HAYNESVILLE SHALE) FIELD
ANGELINA, GREGG, HARRISON, NACOGDOCHES, RUSK, SHELBY, AND
PANOLA COUNTIES, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on December 18, 2012, the presiding examiners have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners' report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that Field Rule No. 3 of the Field Rules adopted in Final Order No. 06-0262000, effective January 24, 2012, for the Carthage (Haynesville Shale) Field, Angelina, Gregg, Harrison, Nacogdoches, Rusk, Shelby, and Panola Counties, Texas, is hereby amended. The amended Field Rule No. 3 is set out as follows:

RULE 3: The acreage assigned to an individual gas well shall be known as a proration unit. The standard drilling and proration units are established hereby to be SIX HUNDRED FORTY (640) acres. No proration unit shall consist of more than SIX HUNDRED FORTY (640) acres; provided that, tolerance acreage of ten (10) percent shall be allowed for each standard proration unit so that an amount not to exceed a maximum of SEVEN HUNDRED FOUR (704) acres may be assigned. Each proration unit containing less than SIX HUNDRED FORTY (640) acres shall be a fractional proration unit. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of gas. No double assignment of acreage will be allowed.

An operator, at his option, shall be permitted to form optional drilling and proration units of TWENTY (20) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit. There is no maximum diagonal limitation in this field.

For the determination of acreage credit in this field, operators shall file for each well in this field a Form P-15 Statement of Productivity of Acreage Assigned to Proration Units. On that form or an attachment thereto, the operator shall list the number of acres that are being assigned to each well on the lease or unit for proration purposes. When the allocation formula in this field is suspended, operators in this field shall not be required to file plats with the Form P-15. When the allocation formula is in effect in this field, operators shall be required to file, along with the Form P-15, a plat of the lease, unit or property; provided that such plat shall not be required to show individual proration units. Provided further, that if the acreage assigned to any well has been pooled, the operator shall furnish the Commission with such proof as it may require as evidence that interests in and under such proration unit have been so pooled. Operators in this field are exempt from the requirements of Rule 86(f)(4) entitled Proration Unit Plat; however operators must, for each horizontal drainhole, file a plat showing the as-drilled path, penetration point, terminus and, if applicable, perforations or external casing packer, for that horizontal drainhole and, for wells treated as stacked laterals, operators must file the plats required by paragraph number 6 of Rule 5. All plats referred to in this paragraph may be either a surveyor's plat or a certified plat, at the operator's option.

For the purpose of assigning additional acreage to a horizontal well pursuant to Rule 86, the distance from the first take point to the last take point in the horizontal drainhole shall be used in such determination, in lieu of the distance from penetration point to terminus.

Done this 29th day of January, 2013.
