

**RAILROAD COMMISSION OF TEXAS  
OFFICE OF GENERAL COUNSEL**

**OIL AND GAS DOCKET  
NO. 8A-0237040**

**IN THE SPRINGER 168 (TANNEHILL)  
FIELD, KING COUNTY, TEXAS**

**FINAL ORDER  
ADOPTING PERMANENT RULES  
FOR THE SPRINGER 168 (TANNEHILL) FIELD  
KING COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on December 11, 2003, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that the following rules shall be adopted for the Springer 168 (Tannehill) Field, King County, Texas.

**RULE 1:** The entire correlative interval from 3683 feet to 3690 feet in the LeClair Operating Company, Inc., Springer Lease Well No. 1, Section 168, Block F, H&TC RR Co./Martin, W.S. Survey, King County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Springer 168 (Tannehill) Field.

**RULE 2:** No well for oil or gas shall hereafter be drilled nearer than **FOUR HUNDRED SIXTY-SEVEN (467)** feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than **NINE HUNDRED THIRTY-THREE (933)** feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well; and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed, whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

Done this sixty day of January, 2004.

**RAILROAD COMMISSION OF TEXAS  
(Order approved and signatures affixed by  
OGC Unprotested Master Order dated  
January 6, 2004.)**
