

**RAILROAD COMMISSION OF TEXAS  
OFFICE OF GENERAL COUNSEL  
HEARINGS SECTION**

**OIL AND GAS DOCKET  
NO. 10-0253238**

**IN THE FRYE RANCH  
(CONSOLIDATED) FIELD, WHEELER  
COUNTY, TEXAS**

**FINAL ORDER  
APPROVING THE FIELD DESIGNATION OF FRYE RANCH (CONSOLIDATED)  
AND ADOPTING FIELD RULES FOR THE FRYE RANCH (CONSOLIDATED)  
WHEELER COUNTY, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on September 13, 2007, the presiding examiner has made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiner's report and recommendation, the findings of fact and conclusions of law contained therein, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

It is ordered by the Railroad Commission of Texas that the application of Forest Oil Corporation for a new field designation for the Frye Ranch (Consolidated) Field (RRC Field No. 33151-200), Wheeler County, Texas be and hereby is approved. The field is designated as Associated-Prorated. Further, all wells currently completed in the Frye Ranch (Granite Wash "A") field are hereby transferred to the Frye Ranch (Consolidated) Field.

Further, it is ordered by the Railroad Commission of Texas that the following rules shall be adopted for the Frye Ranch (Consolidated) Field, Wheeler County, Texas, as hereinafter set out:

**RULE 1:** The entire correlative interval from 11,754' to 15,431' as shown on the log of the Union Texas Petroleum (now Dominion Oklahoma Texas E&P), Ona Black Lease Well No. 1 (API No. 42-483-30780), Wheeler County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Frye Ranch (Consolidated) Field.

**RULE 2:** No well for oil or gas shall hereafter be drilled nearer than FOUR HUNDRED AND SIXTY-SEVEN (467) feet to any property line, lease line, or subdivision line and no well shall be drilled nearer than NINE HUNDRED AND THIRTY-THREE (933) feet to any applied for, permitted or completed well in the same reservoir on the same lease, pooled unit or unitized tract. The aforementioned distances in the above rule are minimum distances to allow an operator flexibility in locating a well; and the above spacing rule and the other rules to follow are for the purpose of permitting only one well to each drilling and proration unit. Provided however, that the

Commission will grant exceptions to permit drilling within shorter distances and drilling more wells than herein prescribed, whenever the Commission shall have determined that such exceptions are necessary either to prevent waste or to prevent the confiscation of property. When exception to these rules is desired, application therefor shall be filed and will be acted upon in accordance with the provisions of Commission Statewide Rules 37 and 38, which applicable provisions of said rules are incorporated herein by reference.

In applying this rule the general order of the Commission with relation to the subdivision of property shall be observed.

**RULE 3a:** The acreage assigned to the individual gas well for the purpose of allocating allowable gas production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be THREE HUNDRED AND TWENTY (320) acres. No proration unit shall consist of more than THREE HUNDRED AND TWENTY (320) acres; provided that, tolerance acreage of ten (10) percent shall be allowed for each standard proration unit so that an amount not to exceed a maximum of THREE HUNDRED AND FIFTY-TWO (352) acres may be assigned. The two farthestmost points in any proration unit shall not be in excess of SIX THOUSAND (6,000) feet removed from each other. Each proration unit containing less than THREE HUNDRED AND TWENTY (320) acres shall be a fractional proration unit. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of gas. No double assignment of acreage will be accepted.

An operator, at his option, shall be permitted to form optional drilling units of FORTY (40) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit. The two farthestmost points of an FORTY (40) acre fractional proration unit shall not be greater than TWENTY ONE HUNDRED (2100) feet removed from each other.

Operators shall file with the Commission certified plats of their properties in said field, which plats shall set out distinctly all of those things pertinent to the determination of the acreage credit claimed for each well; provided that if the acreage assigned to any proration unit has been pooled, the operator shall furnish the Commission with such proof as it may require as evidence that interests in and under such proration unit have been so pooled.

**RULE 3b:** The acreage assigned to the individual oil well for the purpose of allocating allowable oil production thereto shall be known as a proration unit. The standard drilling and proration units are established hereby to be THREE HUNDRED AND TWENTY (320) acres. No proration unit shall consist of more than THREE HUNDRED AND TWENTY (320) acres except as hereinafter provided. The two farthestmost points in any proration unit shall not be in excess of SIX THOUSAND (6000) feet removed from each other; provided however, that in the case of long and narrow leases or in cases where because of the shape of the lease such is necessary to permit the utilization of tolerance acreage, the Commission may after proper showing grant exceptions to the limitations as to the shape of proration units as herein contained. All proration units shall consist of continuous and contiguous acreage which can reasonably be considered to be productive of oil. No double assignment of acreage will be accepted.

If after the drilling of the last well on any lease and the assignment of acreage to each well thereon in accordance with the regulations of the Commission there remains an additional

unassigned acreage of less than THREE HUNDRED AND TWENTY (320) acres, then and in such event the remaining unassigned acreage up to and including a total of FORTY (40) acres may be assigned as tolerance acreage to the last well drilled on such lease or may be distributed among any group of wells located thereon, so long as the proration units resulting from the inclusion of such additional acreage meet the limitations prescribed by the Commission.

An operator, at his option, shall be permitted to form optional drilling units of FORTY (40) acres. A proportional acreage allowable credit will be given for a well on a fractional proration unit. The two farthestmost points of an FORTY (40) acre fractional proration unit shall not be greater than TWENTY ONE HUNDRED (2100) feet removed from each other.

Operators shall file with the Commission certified plats of their properties in said field, which plats shall set out distinctly all of those things pertinent to the determination of the acreage credit claimed for each well; provided that if the acreage assigned to any proration unit has been pooled, the operator shall furnish the Commission with such proof as it may require as evidence that interests in and under such proration unit have been so pooled.

**RULE 4a:** The daily allowable production of gas from individual wells completed in the associated gas reservoir of the subject field shall be determined by allocating the allowable production, after deductions have been made for wells which are incapable of producing their gas allowables, among the individual wells in the following manner:

FIVE percent (5%) of the total field allowable shall be allocated among the individual wells in the proportion that the acreage assigned such well for allowable purposes bears to the summation of the acreage with respect to all proratable wells producing from this field.

NINETY-FIVE percent (95%) of the total field allowable shall be allocated among the individual wells in the proportion that the deliverability of such well, as evidenced by the most recent G-10 test filed with the Railroad Commission bears to the summation of the deliverability of all proratable wells producing from this field.

**RULE 4b:** The maximum daily oil allowable for each well in the subject field shall be 895 barrels of oil per day and the actual allowable for an individual well shall be determined by the sum total of the two following values:

- a. Each well shall be assigned an allowable equal to the top allowable established for a well having a proration unit containing the maximum acreage authorized exclusive of tolerance acreage multiplied by 5% and by then multiplying this value by a fraction, the numerator of which is the acreage assigned to the well and the denominator of which is the maximum acreage authorized for a proration unit exclusive of tolerance acreage.
- b. Each well shall be assigned an allowable equal to its potential based on the most recent well test filed with the Commission multiplied by 95%, provided that this value shall not exceed 895 barrels of oil per day multiplied by 95%.

It is further ordered that any overproduction is hereby cancelled.

Further, it is ordered by the Railroad Commission of Texas that suspension of the gas allocation formula in the Frye Ranch (Consolidated) Field is approved. The allocation formula may be reinstated administratively if the market demand for gas in the Frye Ranch (Consolidated) Field drops below 100% of deliverability. If the market demand for gas in the Frye Ranch (Consolidated) Field drops below 100% of deliverability while the allocation formula is suspended, the operator shall immediately notify the Commission and the allocation formula shall be immediately reinstated. Failure to give such notice to the Commission may result in a fine (as provided for in Tex. Nat. Res. Code §86.222) for each day the operators fail to give notice to the Commission.

Done this the 9th day of October, 2007.

**RAILROAD COMMISSION OF TEXAS**

**(Order approved and signatures affixed by OGC  
Unprotested Master Order dated October 9, 2007)**
