At conference on January 12, 2016, the Commission voted to approve the referenced docket. Due to clerical error, the final order did not contain a flare point, at the Doris Cole Well No. 14D processing facility. The Final Order is hereby amended, *nunc pro tunc*, to correct the error. The corrected order reads as follows:

The Commission, after review and due consideration of the examiners' report and proposal for decision, the findings of fact and conclusions of law contained therein, and any exceptions and replies thereto, hereby adopts as its own the findings of fact and conclusions of law contained therein, and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is ordered by the Railroad Commission of Texas that ConocoPhillips Company is hereby granted an exception to Statewide Rule 32 for flaring at the Doris Cole Well No. 14D processing and injection facilities and at the various tank batteries on the Chalk E (41219) Lease, Chalk G (41220) Lease, Chalk Mary (41221) Lease, Chalk North (41243) Lease, Chalk South (41216) Lease, Douthit (41225) Lease, Kelly Roberts (41244) and (32327) Leases, Reed (41247) Lease and Chalk Sec. 95 (30848) Lease, in the Howard Glasscock (Consolidated) and Howard Glasscock (Wolfcamp7400) Fields, Howard County, Texas. ConocoPhillips is authorized to flare 2,000 MCFPD of casinghead gas from the ten leases, and production commingled with those leases, for a period of two years from October 14, 2015 through October 14, 2017.

The authority is granted provided all production is reported on the appropriate Commission forms. The operator shall file the Statewide Rule 32 Exception Data Sheet and at the same time the appropriate Commission required administrative Statewide Rule 32 Exception gas flaring fee.

Done this 8th day of March, 2016.
