3. On June 20, 2016, Respondent, a limited liability company, filed a Form P-5 with the Commission.

4. Respondent's Form P-5 is delinquent. Respondent had a \$50,000.00 cash deposit as its financial assurance at the time of the last Form P-5 annual renewal submission.
5. Respondent designated itself to the Commission as the operator of the Stringer, Sue (04997) Lease, Well Nos. 1, 2, 3, 4, 5A, 6A, 8, 9, 10, and 12, by filing a Commission Form P-4 (Certificate of Compliance and Transportation Authority), effective June 1, 2016, approved July 14, 2016.

9. The lack of legible signs and identification displaying correct information, as set forth in Statewide Rule 3(2), may cause confusion as to the responsible operator to be contacted and the actual location of a violation or emergency, which can result in delays in remedying a violation or emergency.
10. A Commission inspection report made on July 5, 2017 for the Crow, W. E. (05154) Lease shows that Well No. 4 is leaking oil from an open valve. A follow-up inspection conducted on November 6, 2017 shows that Well No. 14 is leaking from the stuffing box and affecting a 5' x 5' area with produced water.
11. Respondent did not have a permit for said discharges, nor were they authorized under Statewide Rules 8(d)(3), 8(e), 9, 46 or 98.
12. Unpermitted discharges of oil and gas waste, in violation of Statewide Rule 8(d)(1), can contaminate the land surface, affect the health of humans and animals, and may eventually be discharged to surface or subsurface waters, causing pollution.

14. Completion/workover pits used when completing or working over a well that are not maintained, emptied and backfilled, as set forth in Statewide Rule 8(d)(4)(H)(i)(III), may result in unpermitted discharges of oil and gas waste which can contaminate the land surface, affect the health of humans and animals, and may be discharged to surface or subsurface waters, causing pollution.

15. Commission district inspection reports made on June 27, 2017 and October 17, 2017 for the Stringer, Sue (04997) Lease show that Well No. 6A has casing open to the atmosphere.

17. Wells left uncontrolled or open to the atmosphere, in violation of Statewide Rule 13(a)(6)(A), may discharge oil and gas waste onto the land surface and affect the health of humans and animals; these discharges may eventually make their way to surface or subsurface waters, causing pollution.
18. Commission inspection reports made on June 27, 2017 and October 17, 2017, and the absence of reported production since April 2015, showed that the Stringer, Sue (04997) Lease, Well Nos. 1, 2, 3, 4, 5A, 6A, 8, 9, 10, and 12 have been inactive for a period greater than one year. Production from the subject lease ceased on or before March 2015.
19. The Crow, W.E. (05154) Lease, Well No. 19 is a permitted injection well. Commission inspection reports made on July 5, 2017 and November 6, 2017, and the absence of reported production since April 2015, and the total absence of reported injection since Well No. 19 was permitted in January 2017, show that the Crow, W. E. (05154) Lease, Well Nos. 1, 4, 10, 11R, 12, 14, 15, 16, 17, 18, and 19 have been inactive for a period greater than one year. Production from the subject lease ceased on or before March 2015.
20. No workovers, re-entries, or subsequent operations have taken place on the subject well within the last twelve months; the subject well has not been properly plugged in accordance with Statewide Rule 14, 16 TEX. ADMIN CODE § 3.14; and no plugging extensions are in effect for the subject well as allowed by Statewide Rule 14.
21. Usable quality groundwater in the area can become contaminated by migrations or discharges of saltwater and other oil and gas waste from the subject well. Unplugged wellbores, in violation of Statewide Rule 14(b)(2), constitute a cognizable threat to the public health and safety because of the potential of pollution.
22. The total estimated cost to the State for plugging the Stringer, Sue (04997) Lease Well Nos. 1, 4, 10, 11R, 12, 14, 15, 16, 17, 18, and 19 is \$50,200.00. The total estimated cost to the State for plugging the Crow, W. E. (05154) Lease Well Nos. 1, 4, 10, 11R, 12, 14, 15, 16, 17, 18, and 19 is \$54,400.00.
23. The Respondent has no prior history of violations of Commission Rules.

CONCLUSIONS OF LAW

9. Respondent is responsible for maintaining surface control of a well by using wellhead assemblies in compliance with Statewide Rule 13(a)(6)(A). Maintenance of surface control is necessary not only to prevent fluids from being discharged from the wellbore onto the ground surface, but also to prevent any oil and gas wastes present in the wellbore from being displaced to surface by influxes of surface water into the open wellbore.

Respondent is responsible for maintaining the subject leases in compliance with Statewide Rule 14(b)(2), which requires that plugging operations on each dry or inactive well shall be commenced within a period of one year after drilling or operations cease and shall proceed with due diligence until completed, unless the operator is eligible for and obtains an extension of the plugging deadline.
