

**RAILROAD COMMISSION OF TEXAS  
HEARINGS DIVISION**

**OIL AND GAS DOCKET NO. 08-0318579**

---

**APPLICATION OF OXY USA INC. (630591) AND OCCIDENTAL PERMIAN LTD. (617544) TO CONSOLIDATE THE COBRA (WOLFCAMP), DEWEY LAKE (WOLFCAMP), BLALOCK LAKE (WOLFCAMP), BLALOCK LAKE, S. (WOLFCAMP) AND POWELL (5900) FIELDS INTO THE SPRABERRY (TREND AREA) FIELD, GLASSCOCK COUNTY, TEXAS**

---

**FINAL ORDER**

The Commission finds that after statutory notice of the application made by OXY USA Inc. (Operator No. 630591) and Occidental Permian Ltd. (Operator No. 617544) in the above-numbered docket heard on June 19, 2019, the Technical Examiner and Administrative Law Judge (collectively "Examiners") have made and filed a report ("Report") and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after consideration of this matter, hereby adopts as its own the findings of fact and conclusions of law contained in the Report and incorporates said findings of fact and conclusions of law as if fully set out and separately stated herein.

Therefore, it is **ORDERED** by the Railroad Commission of Texas that OXY USA Inc. and Occidental Permian Ltd. are hereby granted consolidation of the Cobra (Wolfcamp) (19235700), Dewey Lake (Wolfcamp) (24488650), Blalock Lake (Wolfcamp) (08734500), Blalock Lake, S. (Wolfcamp) (08739500) and Powell (5900) (72810380) Fields into the Spraberry (Trend Area) (85280300) Field, Glasscock County, Texas.

It is further **ORDERED** by the Railroad Commission of Texas that existing wells permitted in the Cobra (Wolfcamp), Dewey Lake (Wolfcamp), Blalock Lake (Wolfcamp), Blalock Lake, S. (Wolfcamp) and Powell (5900) Fields are hereby transferred into the Spraberry (Trend Area) Field by the field consolidation order as validly permitted wells in the newly consolidated field. Operators of such wells are not required to apply for new drilling permits in the Spraberry (Trend Area) Field. If the locations of such wells do not comply with the spacing or density rules of Spraberry (Trend Area) Field they will nevertheless be transferred into the Spraberry (Trend Area) Field by this field consolidation order without need for new drilling permit applications or spacing or density exceptions to the rules of the newly-consolidated Field.

It is further **ORDERED** by the Railroad Commission of Texas that a Form P-4, Producer's Transportation Authority and Certificate of Compliance, is required to be filed for all leases in the prior existing fields to change the field name to the Spraberry (Trend Area) Field. New lease numbers will be assigned if the operator does not already have an existing lease number assigned in the Spraberry (Trend Area) Field. Form P-16, Acreage Designation, and full lease plats are also required in the new field and should be

sent to the Commission with the Form P-4 if acres are not already assigned to the operator's wells that meet the new field criteria. Operators must respond within sixty (60) days of this order's final and effective date.

Pursuant to §2001.144(a)(4)(A), of the Texas Government Code, and by agreement of the parties in writing or on the record, the parties have waived right to file a motion for rehearing and this Final Order is final and effective on the date the Master Order relating to the Final Order is signed.

Signed on 20<sup>th</sup> day of August, 2019.
