STATEWIDE RULE 32 FOR THE WILLETT POT STILL 5-2C UNIT, FORD, WEST  
(WOLFCAMP) FIELD, REEVES COUNTY, TEXAS**

---

**FINAL ORDER**

The Railroad Commission of Texas ("Commission") finds that after a joint notice of hearing in the above-docketed case was provided to all parties entitled to notice, a hearing was held on September 19, 2019 by a Commission Technical Examiner and Administrative Law Judge. This proceeding was duly submitted to the Commission at a conference held in its offices in Austin, Texas. After considering this matter, the Commission adopts the following findings of fact and conclusions of law.

**Findings of Fact**

1. Luxe Operating, LLC ("Luxe") requested a two-year exception to Statewide Rule 32 ("SWR 32") for the flare point serving the Willett Pot Still 5-2C Unit, Ford West (Wolfcamp) Field, Reeves County, Texas, (the "Flare Point")
2. Luxe submitted a request for hearing on the SWR 32 exception flaring authority on June 26, 2019.
3. Luxe was previously granted administrative exceptions to SWR 32 for the Flare Point, which expires August 30, 2019.
4. On August 21, 2019 the Hearings Division of the Commission sent a Joint Notice of Hearing ("Notice") to Applicant and all offsetting operators in the field setting a hearing date of September 19, 2019. Consequently, the parties received more than 10 days' notice. The Notice contains (1) a statement of the time, place, and nature of the hearing; (2) a statement of the legal authority and jurisdiction under which the hearing is to be held; (3) a reference to the particular sections of the statutes and rules involved; and (4) a short and plain statement of the matters asserted. The hearing was held on September 19, 2019, as noticed. Applicant appeared and participated at the hearing. No one appeared in protest.
5. The gas well gas from the Luxe lease served by the Flare Point is gathered by EagleClaw Midstream Ventures, LLC ("EagleClaw").
6. Luxe has set the operating separator line pressure on the lease served by the Flare Point at approximately seventy-five (75) pounds per square inch ("psi") to comply with the contractual terms of delivering gas into the EagleClaw gathering systems.

7. During events when the produced gas stream's separator line pressure exceeds seventy-five (75) psi, the curtailed volumes of produced gas from the Luxe lease are diverted to the Flare Point for combustion disposal.
8. The daily maximum average volume reported to be produced from the Luxe lease served by the Flare Point since January 2019 is 2,955 thousand cubic feet ("Mcf").
9. The maximum monthly volume reported to be flared from the Luxe lease served by the Flare Point since January 2019 is approximately 9,250 Mcf.
10. The requested SWR 32 exception to flare gas is necessary for Luxe to produce the recoverable hydrocarbon liquids from the Luxe lease served by the Flare Point.
11. At the hearing, Luxe agreed on the record that the Final Order in this docketed case is to be final and effective when a Master Order relating to this Final Order is signed.
